## Manual Test Plan

Verify that the home page looks correct on different browser sizes.

Click begin. You should be redirected to a video page. Move your mouse toward the top of the screen and verify that the navbar appears. Confirm that the navbar looks like the image below.

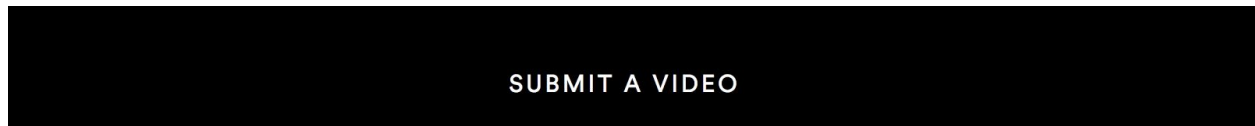

Check the url bar to ensure the video has generated a custom url (this should have the format /watch/5a275a41240ca2711599e4d4). Paste the url into a new tab and verify that you are shown the same video.

Verify that clicking the video title opens the YouTube page in a new tab. Close the tab, and click the title in the upper left. You should be taken to the home page.
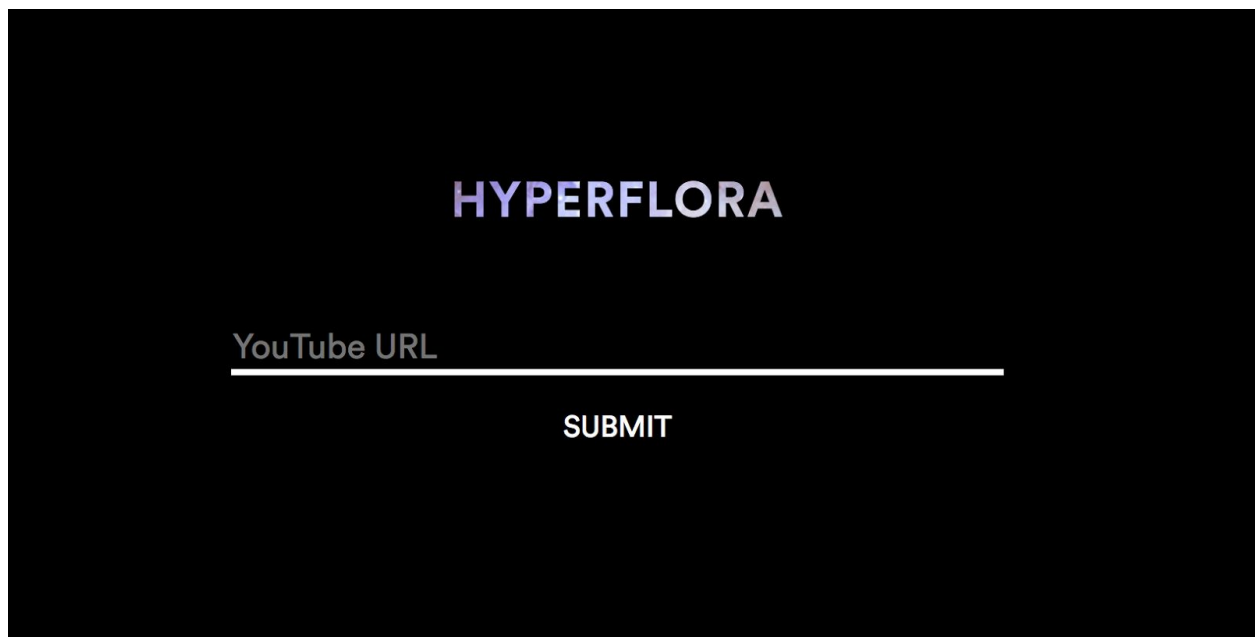

Select a video channel. Confirm that the video page you are redirected to belongs in that category (use best judgement). Click next video in the upper left. Verify that your channel selection is still working (check the url for query string).

Verify that when clicking next video you are not shown the same video twice in a row (click several times to determine this).

Go back to the homepage. Scroll to the bottom and click on "Submit a video."

Verify that the form looks like the image below.

Find a YouTube url, paste it into the url field and click submit. Verify that you are redirected to the home page.

Visit the /admin page and confirm that it looks as depicted below.
